KeyCommand 3.0 is a freeware utility that enables you to assign keyboard shortcuts to specific actions or apps that you want to execute. It doesn't require installation and may be used right from the desktop. You don't have to be a programmer to enjoy the benefits that this small software has to offer. It's intuitive enough to be used by both beginners and advanced users. However, if you want to configure the shortcuts you can simply right-click on the application in your desktop, select "Edit Shortcuts" and press the "Add" button. Each shortcut can be composed of one or more letters that represent various actions. For example, pressing the letter "C" will open the calculator. Other letters are used to represent apps and functions. In the "Shortcuts" section, you can change the following properties: the name of the shortcut, the order in which it appears in the keyboard shortcuts list, its active state (on/off) and whether or not it will show up as a separate application in the system's task bar. You can also change the shortcuts that are assigned to specific keys or keys combinations. For example, press the "F" key in combination with the letter "1" will activate the app that allows you to open the file browser. If you want, you can use the "Search" feature to help you find specific shortcuts. Just type the name of the program you want to find into the search bar and press "Find". KeyCommand 3.0 is a useful utility that can help you save time by enabling you to create a set of shortcuts that you can use to easily accomplish various tasks. Ease of Use: 5/5 Functionality: 4/5 Overall: 5/5 Project Quickview Description: Project Quickview is a handy app designed to quickly create project folders and shortcut shortcuts. The program provides the following features: a preview window where you can easily see and check the arrangement of items inside a project folder, a progress monitor that indicates how much has been accomplished, an adjustable time limit, a checkbox that lets you stop the process if the program takes too long to complete, a visual indicator that informs you of the status of the operation, and an ability to skip the creation of folders with pre-existing ones. The interface has a simple, well-organized layout that 1d6a3396d6

Start using Windows 7 SP1 with new HomeGroup features for easily sharing files and printers with your friends, family, and roommates. HomeGroup lets you set up a group on your local network that allows users to work together on the same files and printers. Find out how HomeGroup works in Windows 7 SP1. Description: The app offers a split-screen view when composing an email. The one displayed on the left is a summary of the message, while the one on the right shows a preview of the full body. The interface is extremely simple, which means it will be easy to use, even for novices. Still, if you'd like to customize the view, you can choose one of the three styles that Microsoft provides: "Gutter", "No Gutter" and "Two Gutter". The app is free to use and the only thing you'll need is a web browser to access it. However, it's not necessary to have an account with Hotmail to be able to use the full features of the app. In fact, the application's developers even provide instructions for Windows 8 users, who don't have a Hotmail account. As you can see, Microsoft has been busy, as it's releasing new features to improve the email application on a regular basis. The same can be said for the new Outlook web app as well, which is also part of the new suite. We're definitely impressed by the huge improvements that have been made in both the Windows OS and email app, as they represent one of the biggest improvements of the last year. Description: With Windows Phone 8, you'll be able to make free calls to other phones by simply adding the other user's number to your phonebook. You can even call contacts in other apps using the same method. In addition to free calls, Windows Phone 8 also lets you send free SMS messages. In order to use these features, you simply need a Microsoft account. This means you can login with your existing account from your other Windows 8 devices. If you don't have an account, you can register for one on Windows Phone. The Windows Phone OS 8 upgrade also improves the camera app. This time around, Microsoft adds more tools to use with your photos, including easy editing and organizing features. Description: Microsoft wants to make it easier for users to find,

What's New in the NASA Spacescapes Windows 7 Theme?

In the early years of NASA's missions the biggest challenge for NASA's astronauts was not exploration or putting humans in space, but keeping them alive. The astronauts needed a reliable and safe computer system and software. And NASA needed to save money. Therefore it was agreed with the astronauts that NASA would develop the spacecraft software for the space shuttle crew. This software would be called the Space Shuttle Computer System (SSCS). The new software would allow the astronauts to do things not only in space, but also in a safe way on the ground.
