We are a german team, with a large part being IT-experts from home offices and small companies. We also have a solution for you. With having a team of 13 IT-experts we want to help you with your archive problems. The team has a german secure server with an encrypted private directory. There is also an encrypted mirror (offering Speed), so you can still get an archive even if the main archive server has down. But our encryption is no deadkey system, so we cannot recover your files. We will also help you with archiving your files in a safe way. You can pick the size of your archive files, and the further options we support are: Discard functionality Delete original files MaxArchiveFiles to store in list (-> at least one file) Common archive extensions: ZIP, RAR, ACE, CAB Batch processing About 60% of our clients have issues with archive files, maybe because they are not able to locate the right archive file, or maybe they are searching for a archive file that was created by a different program (like Windows Explorer). We are just a step forward to resolve your problems. With having such a large team of IT-experts we also help you, if you have a trojan or virus and don't want to loose your files! But we know we can't help you if you have a trojan or virus. We only offer a secure server with an encrypted private directory, where we store your archive files. If you want to search your archive files from an update or archive program, please try it at your own risk. Our C.E.O. - Mario Sückau, brought us a solution, that will allow us to make our mission possible. An encrypted private directory that we are sure is safe. Creating your own archive

file is not very difficult, we did this more than 100 times for our
