GameChanger was a piano system introduced by Yamaha in 1999. The name was derived from the fact that Yamaha was a sponsor of the Williams Tour in 1999 and created a keyboard that brought something new to the market in an era when piano playing was changing. GameChanger II was released in 2000. The GameChanger II is built of solid steel and has a wooden frame. Unlike a conventional piano, the GameChanger II has seven large keys and a fixed pedal. It has a weight of. The GameChanger II differs from its predecessor in several respects. The upper notes, formerly supported by a damper, are now floating. This also affects the action, which has an increase in weight. The weight of the keys is also increased to a greater extent than in previous models. The keys are now flat, and unlike the GameChanger, the damper is not floating. The GameChanger II is also available in 2, 4, and 6 octave versions. The GameChanger II can play Game Changer II. While it lacks the adjustable hammers and hammer rails of the GameChanger II, it is similar to the piano version of an acoustic grand piano in terms of tone, and has a longer sustain and a wider dynamic range.
