Bit Trippin 5/5 CyberLink Media Suite Very good. I was one of those that believe in the best, and so I was very anxious when Cyberlink was removing all functionality. I am glad to have found that they are still very much in business. You can now download this software without using a program. Perception PC Software reviewed the CyberLink Media Suite 9.3 Doesn't work 5/5 Perception PC Software I bought this product from the web site. It does not work in the sense that it does not launch. I tried recieving various updates from cyberlink as well as the three updates I received in the mail. There were no updates. I ran the site reviews of this product. I have tried to uninstall, reinstall, uninstall, reinstall, unistall/reinstall/reinstall again. Although I now have a fully updated version it still doesn't launch. I am willing to send this product back but it appears that I need to have it shipped back to get the download links and utilities updated. PC Labs reviewed the CyberLink Media Suite 8.2.1 The full content of CyberLink Media Suite review in PC Labs. Great Product but its now very buggy. Used it yesterday, today - STILL having problems. It opens but all that is shown is "offline" icon, with blue bar across bottom. See screenshot below. Tried to repair using the latest available updates in the program and these wouldn't install. First tried admin password change. Then reset original, and cycled a few times. NOTHING. Has never worked since updated. BANG - offline again! Now I'm a bit annoyed at how it just doesn't work.
