Using the new technology, ball physics give a football a more accurate, responsive feel, when hit, kicked or caught by an opponent. It also allows for more realistic physical movement, and more responsiveness to player control, like cutting, jogging, drifting and feinting. The celebration animations are tighter and more fluid, adding to the heightening of emotion when players score a goal. New directional movement animations allow the ball to be turned or shifted in any direction, or to kick the ball in the direction you want to. The ball also moves more smoothly through the air, players have more control with their ball touches and pass, and ball moves away more quickly from players who catch the ball or dribble at the goalkeeper. With "Full Control," FIFA Ultimate Team members now have more control over tactical substitutions, and press the "move" button to make a substitution. The new "Preferred Pass" feature allows players to pre-program a preferred team mate, and instruct the team to play a pass in a specific direction. "Preferred Player Selection" is also available for training. "Attack Mode" allows players to choose from a wide variety of attacking options and take control of the match, and "Defence Mode" allows players to strategise their defensive tactics on the fly.
