This is a FPS/RPG hybrid game where the world's theme and the combat are simulated, e.g. running from an enemy, you will see your foes arms dismember in front of your eyes. You choose how they're coming to fight with different weapons - and by that choose the power of the weapon. While you're running, enemies will follow you in every direction, until you either outnumber them or are dead... Combat takes place in a dark fantasy world, with its own unique and original setting. The game world has its own levels, which

are connected to each other with Sky-Gates. When you enter the world, you don't know where to go next - you can enter any of the Sky-Gates and you can remain in the world - but when you want to leave a Sky-Gate, you can either die or the world will be set to a different level (with different Sky-Gates and different environments). Heterodox is a tactical action game with a story that took several years to develop. The game is inspired by classics like Heretic/Hexen, Doom, Strife, Blood, and by modern titles like Half-Life, Dishonored, Deus Ex 1, and Clive Barker's Undying. Game Modes: Story: Each mission starts in a city with a Sky-Gate. You can access the Sky-Gates at any time and leave the world at any time, but can never leave the Sky-Gate to the World. Find mission objectives and reach them. Kill enemies, find keys and treasure, escape Sky-Gates and perform special tricks, solve puzzles, buy equipment and get into a fight with other players. Multiplayer: Up to 3 players can play against each other in local split-screen or multi-screen play. 1. Single player: Each mission

can be played from the beginning to the end. You start with your appearance, and after each level you will meet objectives. 2. Multiplayer: The game has five single player missions (the last one is only a tutorial). Each of the four multiplayer missions can be played at your own pace - any mission can be restarted in a scenario of any difficulty. At the end of the mission, you will get a message of rank. Rank 1 is the highest rank you can get. Rank 1 can be reached after 3, 2 or even 1 mission, depending on the difficulty level. Keywords: Dark fantasy, tactical, action
