Whether you have deleted data accidentally or lost it due to software issues or hardware failure, it is often still possible to recover contacts, messages, photos, videos and other items from your iOS device. Jihosoft iPhone Data Recovery is a user-friendly software solution that provides you with a straightforward way to find and retrieve lost files. It can work with your device directly, as well as scan iTunes or iCloud backup files. Offers multiple recovery modes First of all, you should probably try to connect your iPhone, iPad or iPod and scan them directly, so as to ensure all your recent files are recovered. However, your device may not always be accessible, so you may wish to take advantage of the alternative retrieval methods supported by this program. If your iOS device is damaged beyond repair, it is possible to open an iTunes or iCloud backup and recover data from these sources without having to connect to your device. Salvage media, messages, notes and more After the scan has been completed, you can navigate through the results and preview the recovered content. It is possible to select which items should be recovered, as well as search for relevant text. The application can recover photos, videos, messages, attachments, contacts, notes, voice memos, WhatsApp data and more. Useful recovery tool suitable for novices Jihosoft iPhone Data Recovery features a minimalistic, intuitive UI, and very little user input is required in order to perform a scan and retrieve files. The application also comes with a short user guide, which should prove b7e8fd5c8

This unlock was for a customer that got their AT&T iPhone 5C for free. The original iPhone 5S would not unlock on AT&T CDMA network. We solved this with a simlock factory reset of their iPhone 5C. They had not turned on the phone yet, but we unlocked it for them. They even called Apple and told them they wanted the simlock unlock. They now have the original 5S, 5C simlock unlocked on AT&T. Very happy customer. \*\*Please note, there are multiple ways to unlock your AT&T CDMA iPhone 5C. We have many different simlock unlock methods and services for different people. These unlock services are not included as free.\*\* This is the AT&T CDMA version of the Apple iPhone 5C. This model gets no support for this factory unlock. iPhone 5C - Apple CDMA Phone - NO SUPPORT FOR FACTORY UNLOCK iPhone 5C - Apple CDMA Phone - Support for this Factory Unlock

### What's New in the?

===== Jihosoft iPhone Data Recovery is a simple and powerful data recovery tool. With it, you can scan lost data from your computer, Mac or iTunes/iCloud backup file, and recover what you lost. More... Apple has introduced a new app called Apple TV that allows users to control their Apple TV-enabled devices and content right from their iOS devices, Mac and other devices. The new app is expected to be available for download on iTunes starting September 9th. Apple says that the new Apple TV app on iOS will let you control your Apple TV via iOS devices such as the iPhone, iPad, and iPod touch. The app will let you manage and search content on your Apple TV, watch iTunes movies and TV shows, and some of your installed Apple TV apps and games. The service will also let you search for TV shows, movies, music, and photos with the Apple TV app. According to Apple, one of the best features of the new app is the ability to watch iTunes movies and TV shows right from your iOS device. In order to watch a movie or TV show, you must first download it from the iTunes store and play it locally on your iOS device. Then, you can continue watching the movie or TV show on the Apple TV app. To install the Apple TV app, search for the Apple TV app in the App Store. You can also download the Apple TV app from the website of Apple TV app. You can also try out the Apple TV app by downloading the Apple TV app from the App Store. Apple TV is the official name of the Apple device that was unveiled earlier this week at the Apple keynote address at the Worldwide Developers Conference. Apple TV, which features a seven-inch Apple logo on its side, is part of the company's iOS devices, Mac, Apple TV and Apple Watch ecosystems. Apple TV comprises two parts, a box and a cable, and the latter can be purchased separately. The Apple TV box is largely an extension of iOS and the Apple TV cable is what turns iOS devices, Macs, and other gadgets into the Apple TV. According to Apple, Apple TV is controlled using Siri, its voice-activated personal assistant. Its content manager is Spotlight Search, which indexes everything on the Apple device and can be used to search for content on a TV. The Apple TV app is designed to control Apple TV as well as browse content on it. More... An upcoming version of the Chinese messaging app WeChat will
