Elden Ring is a new fantasy action RPG produced by KONSTONE. It is set in a world in which an endless winter has spread. The only ones who live in the world are the Clan of Magius. The only exception is one boy named Zaerth. He is born into the Clan of Magius, but he has a book called "Elden Ring" that he found among the ruins of an ancient village. Without this book, he is unable to enter his home village. "This book…the words written inside of it call out to me. It calls out to me, you see, and invites me to a different existence." Zaerth thought that if he could enter the Lands Between

with his own means, he would be able to find "Fantasy of the Elden Ring". The game follows his journey, which is full of meaning that was shaped by those around him, to become an Elden Lord in the Lands Between. 　THE OUTLINE OF FANTASY OF THE ELDEN RING　 [The Beginning] 01. At the start of this game, Zaerth must move away from his hometown to the Lands Between. 02. As a kid, he decided to find a younger sister who is missing in the ruins of an ancient village. 03. As he searches for her in the Ruins, he meets the mages who live in the village. 　THE MOVING TEMPO　 04. After that, you start your adventure into the world of Fantasy of the Elden Ring. 05. After searching for the missing sister, Zaerth proceeds to the village and lands where the magi live. 06. In that village, he meets many other people who come from all over the world. 　THE ADVENTURES IN THE LAND BETWEEN　 07. After meeting these people, you proceed to the largest land of the game. The "Lands Between": an extremely vast

land that is full of twists and turns, a place that is overflowing with magic and mysteries. In this land, dungeons with multi-level design are connected with each other, so it is often hard to distinguish which direction to proceed. The "Lands Between"

I am trying to create a page where if a user returns and unfollows the account an alert will be displayed to them (yes I know about the unfollow notification

after). So, I'm trying to use the socialit plugin. I am trying to get this to work: {exp:socialit:friend_actions} {if friend_id == "main:me"} var group = "followers_and_friends"; {/if} Unfollow {/exp:socialit:friend_actions} But it is not working. I'm not getting any errors
