Symantec Endpoint Protection 12.1.6168.6000-[FirstUploads] Serial Key

You have to be clear of which one I need for my "live" activation, and the process is important for someone who's not an ESET Pro user. Some of the download links are no longer available, therefore the installation process is unclear. Now I'm almost sure I need this Key: ESET Endpoint Security 5.00.01.0316 ..please provide me with the ESET Endpoint Security 5.00.01.0316 MD5 and the ESET Endpoint Security 5.00.01.0316 Serial Keys, if available. Thank you for your time A: Your product is: ESET Endpoint Security 5.00.01.0316 Your Serial-Number is: F2A7D24F2A7D2D49C7F01CAD3C9D0787E28758837E6DB97F01CAD3C9D0787E28758837E6DB97F01 Your product MD5 is: 1265D3F1E64DD47D71F41A17B8D84F07 Your product version: 5.00.01.0316 Your product Serial-Number: F2A7D24F2A7D2D49C7F01CAD3C9D0787E28758837E6DB97F01CAD3C9D0787E28758837E6DB97F01 You are trying to activate your product on Computer X with a Serial-Number and Key that is almost certainly NOT correct. Please try and update your product/Activation-Key, then try again. Q: How can I get the total size of a file, including un-parsed data? I need to get the size of a local file (including un-parsed data) and the size of an upload file. The two numbers would be the same but I'm not positive that they are (please correct me if I'm wrong). When I tried using stat, I got the size of the file without parsing but I can't get the size of the parsed version. The numbers don't change when I extract the file from the ZIP and un-zip it in the file system. So, I'm looking for a way of getting the size of a ZIP file that contains only the extracted file.
