What's New in the?

Read messages in real time. Identify the 'Facilities' and 'Severities' using preferred image icons. Sort the received messages by severity and time. Filter incoming messages based on conditions. View messages in real time. Log & email alerts. Reconnect to network. Systems Log Personal Main Features: Read messages in real time. Identify the 'Facilities' and 'Severities' using preferred image icons. Sort the received messages by severity and time. Filter incoming messages based on conditions. View messages in real time. Log & email alerts. Reconnect to network. Systems Log Personal Main Screenshot: Software downloads related to Systems Log Personal Systems Log Personal Systems Log Personal is a user-friendly and reliable application designed to provide you with proper means of monitoring your network, detecting all the messages and alerts exchanged between various devices. In order to use this utility, you need to be connected to a network, so you can have access to the compatible devices, such as routers, switches, Linux and Unix hosts as well as Windows servers, enabling you to track their activities. Systems Log Personal even offers you support for IBM, Cisco, HP and other types of servers. The program normally functions using the default Syslog settings, but allows you to customize its configuration according to your particular needs. For instance, you you have the option of setting the UDP as well as TCP port and interface you want to work with. Moreover, you can set Systems Log Personal to alert you with a sound notification or an email message, in case emergencies occur in your network. You have the option of identifying the 'Facilities' and 'Severities' using preferred image icons. Systems Log Personal offers you two filtering modes: 'Simple' and 'Advanced'. The 'Simple' filter uses the default configuration, enabling you to sort the received Syslog messages by severity and time amount. On the other hand, in order to use the 'Advanced' filters, you need to set the value of a property to a string containing the test conditions. Systems Log Personal allows you to view messages in real time, so any urgent situation is immediately brought to your attention. Additionally, thanks to the email notification feature, you can always be on top of every relevant event and act accordingly. Systems Log Personal is an efficient piece of software that can help you successfully monitor your network, providing you

Minimum OS: Windows XP/Vista/7/8 Processor: Intel Pentium 4 3.00GHz Memory: 1GB RAM
