This Way This comic has been personally found to be confusing for most people. It often takes comics readers a while to figure out what is going on. The idea of the Blobs is quite simple. They start out as mini atomic explosions, but then somehow pull themselves together and become more like humans than before. They develop every day into new Blobs, but only those that manage to do funny things can become leaders of the flock. Unfortunately, there are also those who are totally against the Blobs. They think they are disgusting, and try to do everything they can to get rid of the Blobs and everything they love. These people are the only ones who can win. Saturday, October 26, 2011 Pick A Blob! My robot buddy Chris has recently designed a brand new Blob game for all Blobs! Can you pick my first Blob of 2012? I wish I could pick for you, too, but you need to pick for yourself, so you must simply pick one yourself. Just click on the following scan of my new Big Blob on the right side of the page, then quickly guess the number it is! This puzzle will print out automatically, but after that just use your imagination and continue guessing. The more attempts you get right, the more will be printed on the next page, and the number of printing attempts will also be randomly selected from one to ten. The first past the ten is going to be all mine (of course, and I hope you're smarter than Michael. If you are more than twenty years old, it actually means that you can't pick a Blob!), but if you're quicker than ten times over, the number will increase accordingly. It's really easy, and you have to pick your very first Blob of 2012! Of course, the first past the ten you get is the biggest, but don't get discouraged! It's still very possible

for you to get to the first!! Keep on hitting the guess button, and good luck! Be sure to read the instructions for all your guesses! Tuesday, September 27, 2011 Meeting Blobs! I just heard from my robot friend Chris a few minutes ago, and he has a small update in this comic! "The Blobs have started a new meal and gear program that is changing the world! And in a way it's changed the Blobs for the better. A new generation of Blobs is still in the making, but the
