From what you've reviewed, your device is currently operating at the latest version of HPSA (11.11.55130.6021), is it possible you have another version installed that is conflicting with your HPSA? To double check, please go to the About HPSA section and look for the version number. If you are unable to find the version, it is located at the bottom of the file.Q: How to define default text (for blank form fields) to be displayed instead of default empty value? I have the following code:  

```
import tkinter as tk
def get_name():
    name = tk.StringVar(root) #any blank form field is empty!
    print(name.get())
root = tk.Tk()
btn = tk.Button(text='Go', command=lambda: get_name())
btn.pack()
root.mainloop()
```

 I want to have the default text
