See page for additional AutoCAD 2018 software tools. Usage of AutoCAD AutoCAD is one of the most popular CAD programs available and is used for the majority of drafting and design tasks for architecture, engineering, industrial, and construction. Back to Top AutoCAD has extensive support for sheet metal, pipe and tube, and mechanical design. AutoCAD for MEP. AutoCAD is used for the majority of architectural and engineering design tasks. Architects, engineers, contractors, and others in the building trades use AutoCAD to design 3D models for both engineering and architectural applications. A fully loaded version of AutoCAD costs \$1,995. With AutoCAD you can create 2D and 3D drawings, but AutoCAD is more commonly used for 2D drafting and modeling and is not typically used for 3D modeling. Visual LISP provides a Windows interface to AutoLISP for enhanced user interaction. Visual Basic (VB) - A high-level, interpreted language with object-oriented features. VB provides access to AutoCAD's API and scripting language. .NET - A version of VB written for Windows platforms. It can call AutoCAD from the command line and provide access to AutoCAD's API. AutoCAD is capable of handling the same file formats as the CADDAS-DXF product which allows files to be created, edited and saved in a number of CAD formats. These include Microsoft Windows, Macintosh and UNIX based formats. ObjectARX, an open source ObjectAR language based on C++ The ObjectARX language has been described as "a dynamic typed scripting language for use in conjunction with AutoCAD" and has been shown to have "a surprisingly powerful API for working with AutoCAD". AutoCAD plugins A number of AutoCAD plugins are available to add additional functionality to the product. There are a large number of AutoCAD plugins available on the application store Autodesk Exchange Apps. AutoCAD 3D (2013) AutoCAD 3D was designed to make it easier to create a 3D product. AutoCAD 3D is based on the ArcGIS platform and operates like Autodesk's AutoCAD MEP product. This product is part of the "Ultimate family" of products from Autodesk. AutoCAD 3D is available in two forms - a pay-per-seat (PPT) form, or in a SaaS (Software as a service) form. The SaaS form is available for both AutoCAD and AutoCAD 3D. With the SaaS form, 3D models can be created directly from the web, eliminating the need for local installations of AutoCAD 3D, which can be difficult for large or remote projects. AutoCAD 3D is similar to AutoCAD MEP in a number of ways, including the ability af5dca3d97
