Q: In Qt app, how do I call a slot from C++ code that isn't Qt? I'm writing a personal/sample application and I want to call a function from an input class (inherits QStringListModel), but the model is not QStringListModel (actually I'm not sure of the type of the model, maybe AbstractListModel?). Here is a related question of mine: How to call functions of an arbitrary class from within an inner class of a widget? I tried, through the head of the input class, to
