in this respect, the edius 7 license key in the next year promises to continue to use the edius 7 pro and pcmas a tool in the way you are used to. the coming year 2017, that's not going to change anything in the edius 7 for now. because, one of the major challenges of the previous year was the absence of development of the edius 7 app for android. that's why, in the last month of the year, the development team chose to reveal the edius 7 to the most important market: android . it remains the same, the same as the edius 7 for windows, mac, and also the edius 7 for

linux. the difference is that edius 7 pro will be available for the first time on a mobile device that does not only allow you to edit your videos but also the interface of edius 7 will be accessible for the whole world. you can now access to all the features of edius 7 pro from your mobile, but this is not the only news of the year 2017. if there are two major innovations in the next year in edius 7, the first is the edius 7's version to start with a 4k recording. this 4k recording will be possible thanks to the new edius 7 pro app for android. previously, we only had the 4k recording that can be activated thanks to edius 7 pro's app for windows. the advantage of that is that the recording is done in real time in the 4k format for the same quality as a normal 2k recording. however, there are some issues with the app that may be resolved in the coming year for the android version.
