year 9 - 7 years - mercury marine's heavy-duty engine and engine accessories (pistons, bearing and liner sets) are warrantied to be free of defects in materials and workmanship for 2 years from the date of purchase. the limited lifetime warranty on all outboard and sterndrive mercury engines (including the verado vx) covers mechanical defects in materials and workmanship. this limited lifetime warranty is good for the original owner for five years from the date of purchase. there is also an extended lifetime warranty on all outboard and sterndrive mercury engines (including the verado vx). this extended

warranty covers the engine for the original owner for ten years from the date of purchase. for example, a verado sold and registered in january 2008 will have a 10-year limited, non-declining warranty through january 2018. all mercury engine and drive component warranties are limited to the original owner of the product. warranties are non-transferable, non-assignable and are not valid if the product has been purchased outside of the united states. this warranty does not cover any damage resulting from the use of any such non-mercruiser engine additive, paint, fuel or lubricant. should a component fail, the original owner is responsible for the repair or replacement of the component. if the component has a total replacement value of \$500 or more, it is eligible for free service. the mercury marine service department must be contacted for further information. mercruiser also provides, through the manufacture of their mer-seal flexible o-ring, a corrosion protection

system that operates on the same principle as the mercathode system. if your boat is equipped with a merseal and is powered by a mercurysingle-cylinder outboard, the mercruiser o-ring will provide automatic protection against galvanic corrosion. like the mercathode, the merseal will protect against electrical corrosion due to stray current and any corrosion due to galvanic currents caused by the power package and other submerged parts on the boat. like the mercathode, the merseal should be tested annually for proper operation.

Mercury Race Activation Key Crack

the mercury precision mercathode system provides automatic protection against galvanic corrosion. it is a solid-state device that operates off a boat's 12-volt battery and provides protection by impressing a reverse blocking current that stops the destructive flow

of galvanic currents. if your power package does not come already equipped with a mercathode system, mercury strongly recommends that you install one, particularly if your boat is equipped with a stainless steel propeller or other submerged stainless steel hardware. the mercathode should be tested annually by an authorized dealer for proper operation. customers are also encouraged to contact us with any questions they have about their mercury product. we can be reached by phone at 1-800-hal-surge or by email at customerservice@mercurymarine.com. we will be happy to answer any questions you may have about your mercury product. we are always here to help you keep your boat or motor running and well maintained. the seacore and mercury racing models are covered by mercury's complete 5-year limited corrosion warranty. see your operation, maintenance & warranty manual or contact

your local mercury dealer for additional information. we are not responsible for any damage to your motor or product resulting from improper care and/or storage. if your outboard is inoperable, please contact us by email at customerservice@mercurymarine.com and we will be happy to help you locate an authorized mercury dealer. we are committed to providing you the very best service and support in the boating industry. if you encounter a problem with a boat or product, please contact us. we have a dedicated customer service team ready to respond to your request for help. we can be reached at 1-800-hal-surge, or by email at customerservice@mercurymarine.com.
