
Portable Catia V5 R21

August 2, 2018 - Hello guys, please help me solve the problem. Catia V5R21 64bit DOES NOT WORK on Win 10 PRO 64bit. I hope someone knows the answer. I did a system restore but that didn't fix it. I tried all the options I found in other posts like updating drivers or installing V5R21 + V5L21 at different levels. I installed V5R21 as administrator or in compatibility mode and as a limited user. I have tried all available keyboard shortcuts to switch user. I have tried and updated all available updates and all available packages .

Portable Catia V5 R21
