
La Noire License Corrupt Fix

if you encounter a black screen when you try to start the game, you have a corrupted save file. quit and reopen the game, and this time make sure that you have enough free space on the drive that the game is installed on. if you have the game installed on a removable drive, make sure that you don't have more than 4gb of free space on the drive. if you have the game installed on the c drive, make sure that you don't have more than 4gb of free space on the c drive. save your game file somewhere safe. the overall goal is to allow an ffl or other user to verify that a federal firearms license (ffl) is valid. the user needs only enter the first 3 digits and the last 5 digits of the ffl being verified in the blocks provided and select the reset button. selecting the reset button will clear previously entered data. entering the wrong last 5 digits will result in an error message, even though the license may be valid. an ffl should not use this error message as reason to deny dealing with a type 03 licensee. i have installed the game with the save files that i had in my hdd. although i do not remember doing this, i was sure that i had installed

the game on my own hdd by default. so i decided to make a new save file to play through the game again. when i tried to load the save file, i received an error that the save file was corrupt. i was unable to continue playing the game. i just purchased yesterday the rockstar pass for l.a. noire, which allows you to purchase several dlcs at once at a discount price. i know that game passes like this one require you to visit the in-game marketplace to purchase the dlcs contained in the pass for free, because purchasing the dlcs from the regular xbox live store would charge you twice. the problem is that the in-game marketplace keeps displaying a message informing me that no dlcs are available at the moment and this obviously prevents me from downloading the dlcs like i should be supposed to do.
