Her pocket computer, she normally bills herself at a grand total of \$129.99 per month, is installed with Windows Vista, but she can perform the same features on her Macintosh computer. Plus, it's been years since she's been a savvy shopper, so she turns to GetApp now. GetApp lets you sort recommendations by category, star, price and date. For instance, you can filter the Photo Editing and Photography-related items by price, by star rating, or by categories. An easy way to peruse the results is to click on the "Curated For You" tab at the top. Then, click on an item, and you'll be taken to a page that displays the item's umbrella category and a list of each of its other subcategories, IF the item has them. Each subcategory brings higher-volume tags and subcategories to the top, and generates a separate list of recommended items. This year, the annual Photoshop World Expo will be held April 27 - May 2. It's the place to learn about the newest features and take your skills to the next level. Here are a few of the products on display this year: Lauren says that this is her go-to app as it allows her to work with images that she has stored in her Kindle library, whether there is room for them in her flash library or not. In addition, she's kept old advertisements from magazines as well as work samples from reference books. So the app is open to a lot of different image types. A few weeks ago, I made a quick trip to Target to grab a few snacks for my after-work trip to the gym. Imagine my surprise when, when I went to check out, the cashier asked me if I wanted to scan my phone and instead I could just simply use the kiosk with a few simple strokes on the screen.

When you open a blank image in Acordion mode, the timeline lets you add, move, and edit individual layers. Though it's not the most intuitive interface, it works well enough for most purposes and can help you reveal layers that you've previously hidden (by turning layers visible). Finally, you can use the Adjustment panel to modify colors and layers as if you had a giant light box with a box of colored filters at your fingertips. Photos, especially those you've shot on mobile devices, may contain far too much unwanted information. You can remove it using the Rocks tool, which crops out extra bits and pieces from the edges, and the Healing tool, which identifies and repairs damaged areas.
